

Wedding Invitation Web App

Welcome to Wedding Web App, a beautifully designed wedding invitation web application inspired by Indian cultural aesthetics. This project provides wedding guests with complete event information and allows the admin to manage data and submissions via a secured dashboard.

Project Structure:

- client: React frontend
- server: Node.js + Express backend
- public: Static assets (images, icons, etc.)

Features

Frontend (React + Vite):

- Elegant Indian wedding-themed homepage
- Section-based scroll for Haldi, Sangeeth, Engagement, Travel & Stay
- Contact form with real-time validation
- Responsive layout using Flexbox and Grid
- Admin login page
- Admin dashboard with message viewer and edit event feature

Backend (Node.js + Express + MongoDB):

- Contact form data saved to MongoDB Atlas
- Admin authentication using hashed passwords with bcrypt
- Secured routes for admin-only access
- Environment variables managed via .env

Tech Stack:

Frontend: React.js, Vite, React Router, Axios, Bootstrap

Backend: Express.js, MongoDB Atlas, Mongoose, Bcrypt

Deployment: MongoDB Atlas (database)

The .env file contains the credentials necessary to login into the dashboard page. It can be modified to contain different Atlas credentials but we can use the ones provided for seeing how the project works.

Admin Credentials (Demo):

Username: admin

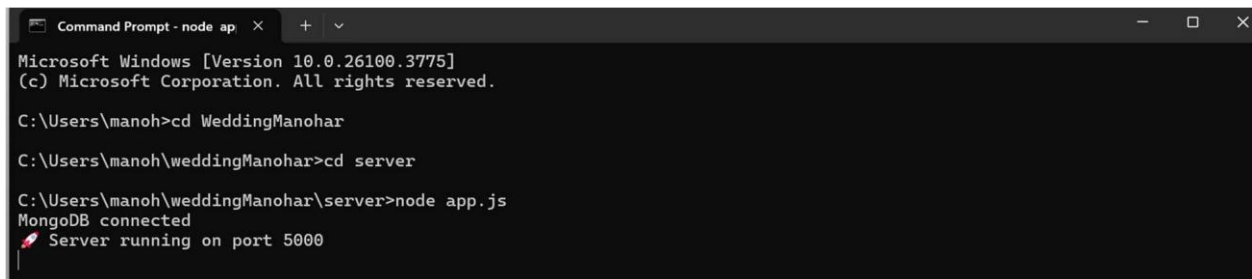

Password: secret123

How to Run Locally

Prerequisites:

- Node.js and npm installed

Firstly set up the backend:

```
Command Prompt - node ap  X + v
Microsoft Windows [Version 10.0.26100.3775]
(c) Microsoft Corporation. All rights reserved.

C:\Users\manoh>cd WeddingManohar

C:\Users\manoh\weddingManohar>cd server

C:\Users\manoh\weddingManohar\server>node app.js
MongoDB connected
Server running on port 5000
```

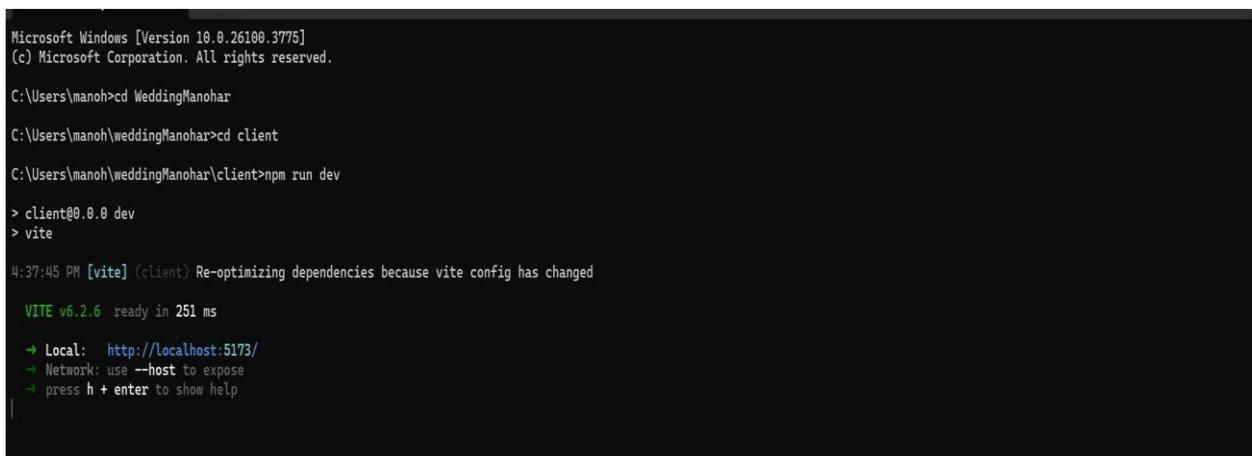

Setup:

Backend: cd server

npm install node

app.js

Front End:

```
Microsoft Windows [Version 10.0.26100.3775]
(c) Microsoft Corporation. All rights reserved.

C:\Users\manoh>cd WeddingManohar

C:\Users\manoh\weddingManohar>cd client

C:\Users\manoh\weddingManohar\client>npm run dev

> client@0.0.0 dev
> vite

4:37:45 PM [vite] (client) Re-optimizing dependencies because vite config has changed

VITE v6.2.6 ready in 251 ms

→ Local: http://localhost:5173/
→ Network: use --host to expose
→ press h + enter to show help
```

Frontend: cd client

npm install npm

run dev
